

The benifits I receive from XM Radio are worth every penny I pay. Yes, I pay for these services, from commercial free music to traffic and weather reports. If other radio medium could provide the clarity and variety of choice that XM provides perhaps they wouldn't have so much to worry about. The fact is, they can't, or don't. I would suggest the N.A.B. and congress worry about things that really matter, and reject N.A.B. petition 04-160. I urge the F.C.C. to reject this petition. and allow XM and other satellite services to continue to provide the services I want and pay for. Respectfully,
Lenny Deets
